

**Mar 23, 2024**

**Homeless Shopping Card in Playground** – A board member met with a licensed electrician Saturday to add lighting on high poles in the playground. They met at the playground at approx. noon, and starting installing this lighting with the full HOA Board approval.

Dusk til dawn LED Flood Lighting with 9500 Lumens were installed on 2 poles and hard wired into our electrical panel. There was lots of activity surrounding this work, including locating an available key to open the playground gate into the breaker box cabinet, and 2 board members had to front up the cash to get the work done as the electrician wanted full-payment at the end of his work totaling \$900.00, including design approval, labor and materials. By 5:20pm, the first up was up and installed, by 7pm, both lights were installed and work was completed.

In addition to the Lighting being added, additional “No Trespassing” signs were added (bolted on) to the fencing, and a board member came back Sunday, Mar 24, 2024 to level off the dirt where the electrical poles were installed and cemented in.

If you see a HOA Board member, please remember to thank them for the immediate action and logistics of fronting monies towards getting this completed. The board is currently still working on the logistics of getting invoiced by the licensed electrician and getting reimbursed for these monies.

Below are some pictures of the work done for the lighting and additional signs.
